GPIO
Mini Project

10 Nov 2022

OUTLINE

1. Input
2. Requirement
3. Output
4. Evaluation criteria
5. Deadline

1. Input

Hardware:

+ 2 button: BT1(PTA3), BT2(PTB8).

+ 1 led RGB(onboard).

2. Requirement

Write program:

SRS 1: Setting pull-down resistor, interrupt on falling-edge for buttons.

SRS 2: After power on, Led Green light up.

SRS 3: Press BT1

- SRS 3-1: Start Leds light up periodically (Green → Red → Blue).
- SRS 3-2: Stop Leds light up periodically(Led current is bright).

SRS 4: Press BT2, invert the light order of LEDs.

3. Output

1. Keil C project(.zip)
2. YourFullName.zip

4. Evaluation criteria

No.	Criteria
1	Demo
2	Logic code
3	Clean code

5. Deadline

Thank you
