UART
Mini Project

8 Dec 2022

OUTLINE

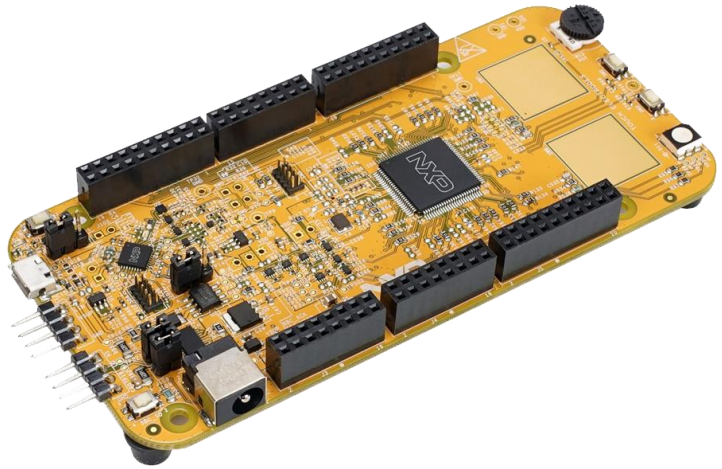

1. Input
2. Requirement
3. Output
4. Evaluation criteria
5. Deadline

1. Input

Hardware:

+ S32K144EVB

+ USB to TTL CP2102

2. Requirement

Write a program: Sum of two large numbers

SRS 1: Setting for LPUART0.

+ Baud rate: 19200, 8 bit data, no parity.

SRS 2: Format send

+ Characters used 0→9, ‘=’, ‘+’

+

Operand 1	+	Operand 2	=

SRS 3: Response message

SRS 3-1: if the format send is correct the response is the result

SRS 3-2: else the response is ”Wrong format¥r¥n”

3. Output

1. Keil C project(.zip)
2. YourFullName.zip

4. Evaluation criteria

No.	Criteria
1	Demo + Based on SRS
2	Logic code
3	Clean code + Coding convention + Comment + Divide functions, modules

Note: Submit late, minus point.

5. Deadline

Thank you
